Figuring out what is covered under the Graduate Assistant Health Plan (GAHP) can be confusing. A good place to start is your Summary of Benefits.

The Summary of Benefits (SBC) is a reference guide to your benefits. Your SBC provides plan descriptions, what services are covered by your plan and what your out-of-pocket costs will be for specific services.

Preventive dental care is an essential part of your overall health.

Preventive dental benefits are included in the GAHP for you and your dependent children, which means you can receive routine cleanings for no cost at the Boynton Health Dental Clinic.

The GAHP also pays 80% of basic restorative services and 50% of major restorative services up to $1,000 per academic year. Dependents receive preventive and other covered restorative dental services at a 20-30% discount. Learn more about what's covered on the Dental Benefits page.

Getting vaccinated for Human Papillomavirus (HPV) can help prevent certain types of cancer.

The Centers for Disease Control and Prevention (CDC) recommends that all people 26 and under get the HPV vaccines. If you are 26 or under, the vaccines are covered 100% by the Graduate Assistant Health Plan, meaning you can receive the vaccines at no cost to you. HPV is the most common sexually transmitted infection and the three-shot vaccine series protects you from the highest-risk strains of HPV. Call 612-625-3222 to make your appointment at Boynton Health or use HealthPartners’ Find a Doctor tool to find a provider.
Did you know?
Receive the services below at no cost to you.

- Routine vision exams
- Screening for sexually transmitted disease and infection
- Preventive health visits
